

The Word on Main Street

A Monthly Newsletter for Supporters of Main Street Child Development Center

Through the Woods

This year, our kids have learned quite a bit about buildings. In March, the teachers led them through the woods that separate us from George Mason University's campus to visit an active construction site where the Peterson Health Center is being built. Children looked for equipment and materials they learned about in class. Then, on their observation notepads, they drew pictures and wrote the names of things they recognized.

Equifax Vols Return!

On Friday, March 24th, Main Street welcomed back volunteers from Equifax who first visited Main Street in October 2016. We were especially excited to see our old friends Dave, Chris and Furhat, who volunteered in October! Volunteers learned to sing a new song, helped children make beaded bracelets, painted with our kids, served snacks, and took part in spirited in games in the playroom!
